<p>FLI-C8.1.2</p>	<p>Palana</p>	<p>The wider Palana area includes uncompromised coastal expanses of white sandy beach, rocky shorelines and headlands at Blyth Point and Sheoak Point rising to 160m from the rocky shorelines. Vegetation is largely intact and landform is undulating to steep and generally undisturbed.</p>	<p>The uncompromised coastal expanses of white sandy beach, rocky shorelines and headlands and native vegetation, when viewed from the road at Palana settlement, from Palana Beach, and from the foreshore and coastal waters.</p> <p>The natural appearance of the landscape and native vegetation cover, outside the Palana settlement.</p>	<p>To:</p> <ul style="list-style-type: none"> <li>(a) retain the natural appearance generated by vegetation and undisturbed landform, which is evident when viewed from public roads, the foreshore and coastal waters;</li> <li>(b) to minimise the impact of development and works on native vegetation, the landform and the scenic values of the area; and</li> <li>(c) retain and restore (where possible) the natural vegetation cover.</li> </ul>

<p>FLI-C8.1.3</p>	<p>Limestone Bay</p>	<p>The area is visually prominent from the foreshore and coastal waters. The area has a natural appearance evident through the intact coastal threatened vegetation communities and pristine shorelines.</p> <p>There is no evidence of human activity in the form of buildings and structures or access roads.</p>	<p>Intact coastal vegetation and undisturbed land form combined with rocky coastal shoreline, interspersed with sandy pocket beaches.</p> <p>The natural appearance of the area and lack of visible impacts from development.</p>	<p>To:</p> <ul style="list-style-type: none"> <li>(a) retain the natural appearance of the area by minimising vegetation clearance and modification to the natural landform;</li> <li>(b) to minimise the impact of development and works on native vegetation, the landform and the scenic values of the area; and</li> <li>(c) retain and restore (where possible) the natural vegetation cover.</li> </ul>
<p>FLI-C8.1.4</p>	<p>Killiecrankie</p>	<p>The area is particularly prominent due to views from the settlement and the coast but also from higher vantage points available from walking tracks within the Mount Killiecrankie Nature Recreation Reserve and Killiecrankie Bluff.</p>	<p>The scenic value is closely related to the unimpeded views from public walking tracks on Mount Killiecrankie, from the settlement, Killiecrankie Bluff, and from the foreshore and coastal waters. The granite plutons as a backdrop to the coastal vegetation and sweep of sandy beach offers a wide variety of spectacular natural vistas.</p> <p>The natural appearance of the area and lack of visible impacts of development outside Killiecrankie settlement.</p>	<p>To:</p> <ul style="list-style-type: none"> <li>(a) retain the natural appearance of the landscape when viewed from public roads, the foreshore and coastal waters;</li> <li>(b) to minimise vegetation clearance along the coast and on the sloping foothills of Mount Killiecrankie;</li> <li>(c) to minimise the impact of development and works on the landform and the scenic values of the area; and</li> <li>(d) retain and restore (where possible) the natural vegetation cover.</li> </ul>

The entire area is exceptionally prone to wind erosion.</p> <p>There are several significant wetlands and only one public access to Marshall Bay beach.</p>	<p>The undeveloped nature of the vista.</p> <p>The largely intact native vegetation across the entire expanse links directly to the foreshore.
